

FAVINI REMAKE

REMAKE IS THE NEW HIGH-END RANGE OF PAPERS CREATED BY UP-CYCLING LEATHER RESIDUES

- USES LEATHER BY-PRODUCTS TO REPLACE UP TO 25% OF VIRGIN TREE PULP;
- FSC CERTIFIED;
- PRODUCED WITH 100% GREEN ENERGY (THE ELECTRICITY IS GENERATED BY FAVINI'S OWN HYDROELECTRIC PLANT);
- CONTAINS 30% POST-CONSUMER RECYCLED WASTE;
- RECYCLABLE;
- COMPOSTABLE.

THE UP-CYCLING PROCESS

Remake, made with both vegetable fibres and collagen fibres, is an example of upcycling.

The shavings and offcuts of leather processing are absorbed by the fertilizer industry, used to obtain regenerated (bonded) leather and partly destined for landfill disposal. Favini use this low-value product to produce a new high quality paper which is both 100% recyclable and compostable.

Favini and Remake have been awarded the following certificates:

Patent pending.
